Professional Summary

Full-stack engineer with hands-on experience building **production AI systems, RAG pipelines, and role-based web applications**. Proficient in modern web frameworks (React, Node.js, FastAPI), LLM workflows (RLHF, SFT), and database design. Passionate about shipping end-to-end solutions with measurable performance and exceptional code quality.

Experience

LLM Post-Training Intern

Mar 2026 – May 2026

Ethara AI (Remote)

- Worked on RLHF and SFT workflows to improve LLM response quality and alignment.
- Annotated and evaluated 100+ prompts daily to identify failure modes and dataset gaps.

Full Stack Developer Intern

Jan 2026 – Mar 2026

Bluestock Fintech (Remote)

- Built role-based features for Taskerzz, a full-stack project and task management app.
- Implemented JWT authentication, RBAC, task assignment, status tracking, and deadline workflows and dashboards.

Projects

[Taskerzz](#) | [React](#) · [Vite](#) · [Tailwind CSS](#) · [Node.js](#) · [Express.js](#) · [PostgreSQL](#) · [Prisma](#) · [JWT](#)

2025

- Built a **full-stack role-based collaboration platform** with Admin/Tasker separation, JWT authentication, and CRUD APIs for project/task management, deadline tracking, and overdue monitoring.
- Designed a normalized **PostgreSQL schema** using Prisma ORM for users, projects, and tasks with real-time productivity visibility across teams via a centralized dashboard.

[RAG Document Search Engine](#) | [FastAPI](#) · [LangChain](#) · [HuggingFace](#) · [ChromaDB](#) · [Streamlit](#)

2024

- Engineered a modular **RAG pipeline** with async ingestion, ChromaDB vector storage, HuggingFace Transformers for semantic retrieval, and Pydantic validation — achieving **50+ docs/min throughput** with **<200ms** retrieval latency.

[Applyr - AI Job Application Agent](#) | [LangGraph](#) · [Groq](#) · [Llama-4](#) · [Flask](#) · [PostgreSQL](#)

2026

- Built a **5-agent autonomous LangGraph pipeline** using Groq/Llama-4 for end-to-end job automation — web search via Tavily, 6-level resume parsing, JD fit scoring, cover letter generation, and cold email drafting with a **hard confidence gate (<70% blocked)**.
- Shipped a **real-time Flask dashboard** with Server-Sent Events (SSE), drag-and-drop JD upload, dual email provider (Resend + Gmail OAuth), and live pipeline health diagnostics.

Technical Skills

Languages: Python, JavaScript (ES6+), SQL, Bash, C++, R

Frontend: React, Vite, Tailwind CSS, HTML5, CSS3, Bootstrap

Backend & APIs: Node.js, FastAPI, Flask, Express.js, Django, REST APIs

Databases: PostgreSQL, MongoDB, ChromaDB, FAISS, MySQL

AI/ML & LLM: LangChain, LangGraph, HuggingFace, RAG, RLHF/SFT, Pandas, NumPy, Scikit-Learn

DevOps & Tools: Git, Railway, Vercel, Streamlit, Jupyter, Netlify

Education

Madhav Institute of Technology and Science, Gwalior

2022 – 2026

B.Tech in Internet of Things — CGPA: 7.5
