

DEVASHISH BOSE

Software Developer — Full Stack Engineer — Python · JavaScript · React · Node.js

bosedevashish7@gmail.com — (+91) 910264397 — India — Open to Relocation — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Professional Summary

Full-stack engineer with hands-on experience building production AI systems, RAG pipelines, and role-based web applications. Proficient in modern web frameworks (React, Node.js, FastAPI), LLM workflows (RLHF/SFT), and database design. Passionate about shipping end-to-end solutions with measurable performance and agentic AI systems built for the real world.

Experience

LLM Post-Training Intern

Mar 2026 – May 2026

Ethara AI (Remote)

- Contributed to RLHF and SFT workflows at Ethara AI, evaluating **100+ prompts daily** and surfacing recurring failure modes in instruction-following, hallucination, and constraint adherence — directly informing dataset curation priorities.

Full Stack Developer Intern

Jan 2026 – Mar 2026

Bluestock Fintech (Remote)

- Built and shipped **Taskerzz** end-to-end: JWT authentication, RBAC for Admin/Tasker role separation, task assignment, deadline tracking, and overdue monitoring dashboard — live at [taskerzzz-production.up.railway.app](#).

Data Analyst Intern

Jun 2025 – Jul 2025

Elevate Labs (Remote)

- Processed large datasets using **Python (Pandas, NumPy)** to extract actionable business insights; built Power BI dashboards for stakeholder KPI tracking — awarded **Best Performer** for the cohort.

Projects

Taskerzz | *React · Vite · Tailwind CSS · Node.js · Express.js · PostgreSQL · Prisma · JWT*

2025

- Built a **full-stack role-based collaboration platform** with Admin/Tasker separation, JWT auth, and CRUD APIs for project/task management, deadline tracking, and overdue monitoring.
- Designed a normalized **PostgreSQL schema** using Prisma ORM for users, projects, and tasks with real-time productivity visibility via a centralized dashboard.

RAG Document Search Engine | *FastAPI · LangChain · HuggingFace · ChromaDB · Streamlit*

2024

- Engineered a modular **RAG pipeline** with async ingestion, ChromaDB vector storage, HuggingFace Transformers for semantic retrieval, and Pydantic validation — achieving **50+ docs/min throughput** with **<200ms** retrieval latency.

Applyr — AI Job Application Agent | *LangGraph · Groq · Llama-4 · Flask · PostgreSQL*

2026

- Built a **5-agent autonomous LangGraph pipeline** (Groq/Llama-4) for end-to-end job automation — web search via Tavily, 6-level resume parsing, JD fit scoring, cover letter generation, and cold email drafting with a **hard confidence gate (<70% blocked)**.
- Shipped a **real-time Flask dashboard** with Server-Sent Events (SSE), drag-and-drop JD upload, dual email provider (Resend + Gmail OAuth), and live pipeline health diagnostics.

Technical Skills

Languages: Python, JavaScript (ES6+), SQL, C++, Bash, R

Frontend: React, Vite, Tailwind CSS, HTML5, CSS3, Bootstrap

Backend & APIs: Node.js, FastAPI, Flask, Django, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, ChromaDB, FAISS

AI/ML & LLM: LangChain, LangGraph, HuggingFace, RAG, RLHF/SFT, Pandas, NumPy, Scikit-Learn

DevOps & Tools: Git, Docker, Railway, Vercel, Netlify, Streamlit, Jupyter

Education

Madhav Institute of Technology and Science, Gwalior

2022 – 2026

B.Tech in Internet of Things — CGPA: 7.5

Certifications

Oracle Agentic AI Foundations Associate — Oracle University

Jun 2026

AWS Cloud Practitioner Essentials — AWS Skill Builder

Jun 2026

GitHub Foundations Certification — GitHub Education

Jun 2026
